

Tribute To Dr. Eckener

People Take Visits Of Graf Zeppelin As Matter Of Course

A writer in the New York Evening World says: "It is interesting, as showing what has happened with regard to this 'air-mindedness' that is so often spoken about, that the Graf Zeppelin, fighting the worst weather that it has ever encountered, caused the smallest stir by its arrival here that it ever caused. People now take it for granted that it will arrive safely and sail safely on schedule, just as they take it for granted that the 'Europa' will arrive and depart safely and on schedule, or the 'Bremer,' or the 'Berengaria.' She has become, in the minds of the American people, a sort of aerial liner, a little more exciting, no doubt, than an ocean liner, but in pretty much the same class. Dr. Eckener, then, if he is a reflective man, will realize that this matter-of-fact acceptance of his presence was perhaps the highest tribute to him and to his ship that could be paid. People no longer wonder about the Graf Zeppelin, but realize that regular air transport over the Atlantic is now a reality.

Some credit to Mr. Hoover as a prophet, it seems to us, is due in this connection too. It will be recalled that quite casually, before any of us had ever seen the Graf Zeppelin, he said that regular airship travel across the Atlantic would come in a few months. Well, here it is.

PALE FACES JADED NERVES

Due To Weak, Watery Blood

Anemia — impoverished blood — comes so stealthily that it is often well advanced before recognized. Fatigue and discomfort the earliest manifestations of the trouble are seldom taken seriously. Soon the face becomes pale; the nerves jaded; the heart palpates violently after the slightest exertion; the appetite becomes fickle and before you realize it you are in a terrible plight. At such time, by enriching and purifying the blood Dr. Williams' Pink Pills will build up the nerve cells and correct the run-down condition. Concerning them Miss Margaret Torrey, Toronto, Ont., says: "I suffered a complete breakdown. My heart would palpitate on the least exertion. Nothing I ate agreed with me. I started taking Dr. Williams' Pink Pills and by the time I had taken several boxes I was ready for anything and had regained my weight and my distressing symptom had left me."

You can get these Pills from any dealer in medicine or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

New Baby Auto

Automobile Being Made To Sell At \$200 In United States

It is stated that General Motors have under construction a small four-cylinder automobile along the lines of the English Austin, which will retail in the United States at around \$200. Patterns are being made in Detroit for the new radical design, which is expected to greatly extend the ownership range of the automobile, and to boost business, which has fallen off seriously in the high-priced models. Details of the new motor car are being jealously guarded.

Persian Balm creates lovely complexion. Velvet smooth. Cools and relieves the skin. Makes it delightfully soft-textured. Aluringly fragrant. Delightful to use. Swiftly absorbed by the tissues, imparting that elusive charm so distinctive of the dainty woman. Persian Balm protects the delicate skin. Preserves and enhances the loveliest complexion. Every discriminating woman should use this silvery lotion. It is unrivaled as a flawless aid to beauty.

British Columbia Head Lettuce

Head lettuce is moving from the Armstrong fields, and it is said that the acreage will provide shipments totalling between 30 and 40 cars; the movement being greater this year than last.

There is probably no other modern development of astronomy that has so revolutionized the science as the application of photography.

If insects can't think how does a fly know when you reach for a swat-ter instead of a sweet?

Falling Hair

Use Minard's before it's too late. It checks falling hair and stimulates new growth as well. Apply persistently to scalp four times a week.

MINARD'S
"KING OF PAIN"
LINIMENT

For a Unified India

New Era Is Visualized In Second Volume Of Simon Report

India, with its teeming millions, its history stretching back into dim antiquity, ever a story of division and differences, its many religions, is visualized in the second volume of the Simon report as ultimately one strong unified nation occupying an important place among the British commonwealth of nations. Although the process may take many years, the report foresees India eventually welded into one great confederacy under a federal government to which not only British India, with the exception of Burma, but also the individual Indian states under native rulers would adhere. In the meantime the report recommends the building of a federation founded on the eight governors' provinces. The remaining governor's province, Burma, would be entirely separate from India.

The provincial governments would be the schools in which the training of the Indians in self government would be continued. A constitutional framework would be set up for the provinces by a revised India Act, which would be broad enough to permit of adjustments to meet the varied requirements of the different provinces and permit of the unhindered or uninterrupted growth to complete responsible government.

The governor of the province would form his ministry but while it would not be necessary in every province that every minister should be a member of the legislature, members from the legislature would be eligible for any of the portfolios in the cabinet and there would be joint cabinet responsibility. At present in the provinces there is a division of responsibility, and restricted authority.

The British army must remain in India. The well-being of India and the well-being of the Empire require its presence there for many years to come, much as it is constituted today.

Canoe Won Daring Race With Death

Amid Treacherous Ice Floes Transported Sick Northerner To Churchill

Hardships of a daring two-day voyage in an open canoe through floating blocks of ice in Hudson Bay to bring Dr. Ford, Hudson's Bay Company factor at Monia, 80 miles north of Churchill, to the latter place for medical aid, were described at The Pas by the company officials. On May 20 he fell victim to a mysterious malady. For three weeks he battled for life with only the best medical assistance afforded in such a settlement.

As he was rapidly weakening it was decided to bring him, in a canoe. An open freight canoe was fitted with a sail, loaded with scant provisions and prepared for departure.

Kenneth Carter and two Eskimos volunteered to take the sick man through the hazardous course to the new northern shore.

The party set out early in the morning of Thursday, June 5. Paddles combined with a small sail forced the small boat through the heavy sea that ran during the most of the trip. Twice the party were nearly swamped. Ice blocks proved a danger during the voyage.

Ford weakened perceptibly during the long hours under the open sky. Although the days were warm there was a sudden drop in temperature during the evening. On Saturday morning, June 7, the four arrived at Churchill, and Ford was given treatment in the Hudson's Bay Company post there. On Monday, the 9th, he was brought on the Muskeg Limited to The Pas. He arrived there Wednesday morning, June 11, and left in the evening for the hospital in Winnipeg.

Asthma Can Be Cured. Its suffering is as needless as it is terrible to endure. After its many years of refusal of the most stubborn cases no sufferer can doubt the perfect effectiveness of Dr. J. D. Kellogg's Asthma Remedy. Comfort, body and peace of mind return with its use and nights of sound sleep come back for good. Ask your druggist; he can supply you.

At The Final Exams

People go about Venice in Gorgonzolas.

A polygon is a man who has many wives.

A brunette is a young bear.

Ambiguity means having two wives living at the same time.

A figure of speech is a way of talking or writing by which you say what you don't mean and yet mean what you say.

A circle is a line which meet its old end without ending.

The Normans introduced the Frugal system.

Reduction In Postage

Rates On Letters and Parcels Outside Canada Are Less

Reduced postal rates on Canadian mail destined to foreign countries with the exception of the British Empire, France and North and South America, became effective July 1, according to announcement by Postmaster-General's Department. The changes resulted from the World Postal Congress held in London, England, last year, and will affect many countries of the world.

Under the new rates, letters will be carried for five cents for the first ounce and three cents for each subsequent ounce or fraction. The postcard rate will be three cents. The rate on printed matter will be one cent for each two ounces.

Commercial papers will be carried for five cents for a packet not exceeding four ounces in weight and one cent for every two ounces thereafter. The rate on samples will be two cents for a packet not exceeding four ounces in weight and one cent for every additional two ounces.

International reply coupons will be sold at seven cents each and the redemption value will be at the rate of five cents in postage stamps for each coupon.

All these rates apply only to parcels or letters destined to points outside Canada.

Speed Boat Shipped

British Girl Has Entered Craft For International Trophy

"Estelle V.," the motor boat with which Betty Carstairs hopes to establish a new record at Detroit, was shipped from England on the White Star liner "Calgarie," accompanied by five mechanics. From Halifax the boat will be shipped by Canadian National Railways to Gravenhurst, Ontario, where it will be turned up in the Muskoka Lakes before the Detroit races.

As a result of Major Segrave's death, Miss Carstairs will be the only British entrant for the international trophy.

Many mothers have reason to bless Mother Graves' Warm Extremities, because it has relieved the little ones of suffering and made them healthy.

Puzzle For Fishermen

Scotch fishermen who have handled thousands of tons of many kinds of the funny tribe are puzzled over a large fish of unknown species which was caught in a net in Monsey Firth, 20 miles off the Banffshire coast, recently. The oldest fishermen say it is unlike any they have ever seen. It was still alive when landed, hours after its capture.

Minard's Drives Away the Headache

No Question About It. "Yes, my friends," said the theological lecturer, some admiring Moses who instituted the old law, some Paul, who spread the new. But after all, which character in the Bible has had the largest following?

As he paused, a voice from the back bench shouted "Ananias."

Postal savings in Japan recently passed the \$1,000,000,000 mark.

Keep Foods Deliciously Fresh

Keep your foods—cakes, bread, pies, cut meats, etc.—under a covering of Para-Sani Heavy Waxed Paper. You'll be amazed at the length of time they'll stay fresh...delicious! Para-Sani keeps them from staling. Get Para-Sani in the handy, sanitary knife-edged carton. For less exacting uses ask for Appleford's "Centre Pull" Packs in steel form.

OPEN SORES
HEAL IN QUICKEST TIME KNOWN
No matter how long they have existed, these sores, ulcers, chancres, hemorrhoids, piles, etc., will be healed by the use of Dr. Williams' Pink Pills. It is the only medicine that will cure them. It is the only medicine that will cure them. It is the only medicine that will cure them.

Coal Movement Arranged

Everything Ready For Shipments From Alberta and Saskatchewan Into Manitoba

All administrative arrangements in connection with the movement of Alberta and Saskatchewan coal into the Manitoba market under the recently granted subvention to aid in the ousting of imported fuel, are now completed, it was stated by Frank G. Neale, secretary of the Dominion Fuel Board, Ottawa. Mr. Neale was in conference, at Winnipeg, with operators from Alberta and Saskatchewan and also with distributors and railway officials.

"The machinery is all set up to handle the administrative work, the co-operation of the railways has been secured and the operators and distributors understand what is required of them," said Mr. Neale. "With the weapon now in their hands with which to combat the importation of foreign coal, it now is up to the coal people to use it."

English Language Spreading

American Books Have Extensive Market In Foreign Countries

The wide and growing prevalence of the English language is attested by the fact that countries to which our tongue is that of a foreigner take high rank among the purchasers of books published in the United States. The Department of Commerce supplies the information that American books have an extensive market in foreign countries. While naturally the United Kingdom and Canada supply the largest number of readers, the country that stands third in the purchase of books made in the United States is China. Latin America and the Philippines take large numbers. That the third best customer for books printed in the English language is China shows how widely the English language is spreading, and with it, of course, Anglo-Saxon culture.

A Prime Dressing For Wounds. — In some factories and workshops carbolic acid is kept for use in cauterizing wounds and cuts sustained by the workmen. Far better to keep on hand a bottle of Dr. Thomas' Electric Oil. It is just as quick in action and does not scar the skin or burn the flesh.

After 62 years of waiting the congregation of St. Michael and All Angels' Church, Hensburgh, Scotland, have just decided to complete the erection of the uncompleted church tower.

Canadian and World Progress

The above is the main heading of an article in the current issue of Toronto Saturday Night dealing with the present economic situation. The sub-headings to the article state: "Dominion's Rate of Advancement Far Above Other Nations—Favorably Situated To Share Again In Progress."

Because, owing to the present temporary depression in Canada, as throughout the world, but fortunately less acute in this country than elsewhere, there is a tendency on the part of many people to become unduly pessimistic, it is perhaps well to pass on some excerpts from this very illuminating article in the Toronto paper:

Economic life is ever in a state of flux. The fortunes of nations are affected by some radical change which may raise or lower their status among the powers. Business men find themselves drawn into the current of new demands and competition, through which the most careful navigation is necessary. Even persons in the most humble circumstances and those who for one reason or another are not engaged in active work cannot fail to notice how their living habits are altered over a period of time.

The most recent period of prosperity probably lends itself to more thorough analysis than any other; for one reason, because from the data available we can more accurately measure the forces employed; we can well determine the degree of economic recovery from the most disastrous conflict in history. Ten years ago the receding tide of war influences left a mass of economic disorder. Inflation of credit and currency, severe depression in commodity prices, unstable political conditions, an enormous weight of debt and taxation and serious labor troubles—these were but a few of the difficulties which faced world business.

The economic forces of the world were finally mobilized along the broadest front ever occupied by an army of workers. The ensuing advance was not uniform. The world over the United States, Canada, France and Argentina swept ahead of other countries, but progress was made almost everywhere on the globe, and in this period of intense economic activity world production reached a record level.

An analysis made by the Canadian Bank of Commerce bears out this statement. An interesting sidelight in that analysis is a comparison between the progress of Canada and that of the world as a whole. It should not be taken for granted that Canadian production of basic commodities exceeded that of every other country, but it is a proven fact that the rate of increase in Canadian production exceeded that of the world by a wide margin in many of the most important branches of economic life.

This advance of Canada was so rapid as to place her among that small group of nations which enjoys a highly diversified economic organization, and one which has a broad field of opportunity for the application of agricultural and industrial science and the direction of business into the safest channels.

Consider a few figures. Between 1925 and 1928, world wheat production increased 13 per cent, but in that same period Canadian wheat production increased 35 per cent. Coarse grains production increased in Canada 21 per cent, as compared with a world increase of only 5 per cent. Coal production—world increase, 5 per cent, Canada, 35 per cent. Oil production—world increase, 24 per cent, Canada, 88 per cent. Lead production—world increase, 11 per cent, Canada, 32 per cent. Copper production—world increase 18 per cent, Canada, 81 per cent. Pig iron production—world increase, 14 per cent, Canada, 31 per cent. Steel production—world increase, 20 per cent, Canada, 63 per cent. Automobile production—world increase, 7 per cent, Canada, 66 per cent. Paper production—world increase 9 per cent, Canada, 31 per cent. Aluminum production—world increase 15 per cent, Canada, 125 per cent. Artificial silk—world increase, 103 per cent, Canada, 217 per cent. Water power developed—world increase, 17 per cent, Canada, 43 per cent. Foreign trade (value), world increase, 3 per cent, Canada, 26 per cent.

The foregoing cannot, of course, be accepted as a complete registration of the world's economic activity, nor should it be regarded as painting a picture of unalloyed prosperity; perhaps it goes without saying that the world has not yet reached that ideal state where the work of all its people can be accurately recorded, and where this work will be in such perfect form that none shall struggle against difficulties or suffer distress.

In the current year we see the aftermath of some misdirected economic effort, and of the greatest speculative boom in history. But, whatever the actual demand is today, the world's needs must eventually go on increasing, and its present great productive capacity will be called into active play when the present period of unsettlement is over and the stage is again set for prosperity. As for Canada, her imposing record of progress achieved in the brief space of the last four or five years gives but a hint of her potential power, and of the position which, by the development of her natural wealth, she can take when world progress is resumed.

Heat and Sound Insulation

Diatomite is a light fluffy material composed of the minute siliceous skeletons of diatoms, and is used in industry as an insulator against heat and sound, for filtering, and as an admixture in concrete and plasters. The Dominion has a large number of diatomite deposits in British Columbia, Ontario and the Maritimes.

And Sixty Days

There is a story about a man who lay down among the victims of a train wreck that he might claim damages, and now Glasgow reports a man who was hurt in a fight and was taken to the hospital along with those hurt in a tramway accident. He got £10 damages from the company and 60 days in jail when the fraud was discovered.

Most Costly Lightning Stroke

The costliest lightning stroke known was that which struck the U.S. Naval Ammunition Depot at Lake Denmark, N.J., in 1926, resulting in the loss of 31 lives and damage amounting to \$93,000,000.

What a man gets out of a job depends a great deal on what he puts into it.

Nearly One Billion Dollars Invested In Electric Power Stations Throughout Canada

Nearly one billion dollars was invested in central electric power stations in Canada at the end of 1928, or \$956,919,603 to be exact, according to an official report issued by the Canadian Government Bureau of Statistics. This is twice the amount of the investment in this industry in 1920 and over \$90,000,000 more than the total in 1927. An indication of the importance taking place in electric power developments throughout Canada and the amount of capital being invested, is given by the statement in the report that the total of \$956,919,603 was a larger capital expenditure than the railways of Canada reported for 1928.

The rapid growth of the pulp and paper industry in the Dominion in recent years has been an important factor in the growth of central electric power stations. In the year under review, the electric motors in the pulp and paper mills of Canada had a rating of 859,017 horse-power or 36 per cent. of the total rating of all such motors in manufacturing industries and mines, an increase of 520 per cent. since 1920.

Central electric power stations in Canada in 1928 produced 16,337,804,000 kilowatt hours, an increase of 12 per cent. over the output in 1927, and 177 per cent. compared with the 1920 output.

The number of customers who purchased power from the central electric power stations was 1,464,095, an increase of 82,037 over 1927. Only 1.6 per cent. of the electric power produced in the central stations is from fuel plants. Water power is among the principal of Canada's natural resources. There is available 20 million horse-power at ordinary minimum stream flow throughout the year rising to over 25 millions for at least six months of the year. To date only about 5,500,000 horse-power have been harnessed.

Compared with other countries, Canada stands second only to the United States in turbine horse-power installation, and second in turbine horse-power installation per 1,000 of population, Norway alone being higher. On a per capita basis Canada has nearly five times the installation of the United States.

There is now scarcely a village in Canada that does not come in advantages of electric power. In British Columbia, for each 100 of the population, 18 families are using electricity for lighting their homes; for all Canada the average is 14.5. This means, reckoning 4.3 persons to a household, that over two-thirds of the homes in Canada, rural and urban included, are using electricity for lighting and other domestic purposes.

Using British Typewriters

Four New In Offices Of Mounted Police, At Regina

The British preference has made its show in the equipment of the R.C.M.P. offices in Regina. There are now four high grade typewriters made in Great Britain, used in the R.C.M.P. offices.

It is said by those that use the machines that they come in price with the cheaper United States machines, and in performance with the best machines manufactured in the United States. The typewriters have strongly built frames, and though displaying a slight variation to the standard machine manufactured in the United States, have the standard keyboard.

In No Danger

Sandy McPherson was travelling to Glasgow, and on the way, he felt thirsty, so he took out a bottle and drew the cork. Just as he was about to take a taste, a fellow passenger in clerical garb addressed him:

"Excuse me, sir, but I am 65 years of age, and I have never tasted a drop of whisky."

"Dinna worry yerself," said Sandy, "you're no' gawn te start noo."

"Let's go for supper to the 'Three Sparrows'. The other day I found a collar suit in the soup?"

"Perhaps you had a neck-tie today." — Pages Gates, Tverdon.

W. N. U. 1844

May Be Made Useful

Possible That Goldenrod Farming May Become Popular

Goldenrod is a beautiful flower and a pestilent weed. It grows all over the country and so comes as near as anything to being our national flower. Modern medical science says it is not goldenrod but ragweed which causes hay fever. If Henry Ford's experimental goldenrod farm in Georgia succeeds in commercializing Edison's rubber, we may see goldenrod farming becoming as widespread as wheat farming is today. This is not impossible, but hardly probable. Yes every crop the farmer grows was once a weed and has been made into a crop by somebody's discovery that it is useful to humanity.

Co-Operative Associations

Organizations In Canada Now Reach Total Of 824

Co-operative associations in Canada number 824, according to the latest federal figures, with a total membership of 512,835, which includes the grain growers of the Prairies, the largest co-operative body in Canada, dairy farmers and fruit and vegetable growers of the eastern provinces. Apart from these there are some 36 co-operative distribution societies affiliated with a central co-operative union. There is also a number of consumers' co-operative societies outside the union of which the majority are in the western provinces.

(By Annebelle Worthington).

A stunning outfit for deb and the little sub-deb who follow closely in the styles of her debutante sister. Style No. 3282 is printed tub silk that would appeal to any smart miss in its attractive dusty-pink tones. The shoulder and neckline bows are of plain faille ribbon in the deepest shade of the print.

The long-waisted bodice is caught with plaits at left hip beneath the bow, which makes the right side quip deep emphasizing its diagonal line. The gathered tiers of skirt are decidedly youthful.

This versatile model comes in sizes 12, 14, 16, 18 and 20 years. It is dainty for afternoon in chiffon in coral-red shade. Wool challis prints, printed dimity, printed batiste, pastel dainty crepe silk, printed lawn and printed voile are smart. Pattern price 25 cents. Be sure to fill in size of pattern. To Enlarge Grain Elevators

Increasing Grain Handling Facilities In Western Canada

At the last session of the Federal Parliament of Canada \$1,800,000 was voted for increasing the grain handling facilities in Canadian Government storage elevators at Moose Jaw and Saskatoon, Saskatchewan, and for the construction of a new elevator at Lethbridge, Alberta, at a cost of \$900,000. The storage facilities at the Moose Jaw elevator are to be enlarged this year at a cost of \$450,000 and an addition to the one at Saskatoon is to cost \$450,000. Canada is well equipped with grain elevators. There are a total of 5,481 with a combined storage capacity of 368,255,000 bushels. With the exception of the huge terminal elevators at Fort William, Port Arthur, Montreal, Vancouver and other ports, nearly all our country elevators located at railway stations throughout the three prairie provinces—Manitoba, Saskatchewan and Alberta—the great grain producing area in Canada, over 90 per cent. of the total wheat crop of Canada is produced between Winnipeg and the Rocky Mountains.

Registered Seed Wheat

One Hundred Million Bushels Of 1929 Wheat Crop In Saskatchewan Was Progeny Of Registered Seed

Based on an average distribution of 20,000 bushels of registered seed wheat annually during the last five years, it is estimated by M. P. Tullis, general manager of the Saskatchewan Registered Seed Growers, Limited, that at least 100,000,000 bushels of the 1929 wheat crop of Saskatchewan was the progeny of registered seed, after allowing for three-fourths of the increase in each year finding its way into commercial channels. The high grade of the bulk of the 1929 crop, says "The Optimizer," was attributed by Mr. Tullis to the steady stream of registered seed sent out to the farms during the period.

Weeds On Highways

Provide Source Of Infection To All Surrounding Fields

A. R. C. Smith, of the Weed Inspection Department of Western Ontario, stated recently that the matter of weed control on public highways is very important, in that the highways provide a source of infection to all the surrounding fields. The importance of controlling perennial sow thistle cannot be emphasized too much. Mr. Smith declared that it was estimated that 100,000 acres of that weed was harvested in the province in one year.

The Red Cross

High as God's mountain
Whose white, melting snow
Refreshes dry valleys
And grain fields below.

Deep as the love
Of the mother, who gave
Her son; that forever
Old Glory might wave.

Broad as the bosom,
Of blue seas, that rest
In His hand: Let us give
Not our "bit," but our "best."

The world is behind
And God is above
The Red Cross of Charity,
Mercy and Love.

The Changing Times

Conditions Nowadays On The Farm Are Different According To This Informant

Today's farmer is changed from that of yesterday's; he is coming to be an ally individual who controls a lot of levers and lets the machinery do the sweating. He is more familiar with the monkey-wrench than he is with the pitchfork; and through the aid of the gasoline tractor, the nightmare of inability to get sufficient help for seeding has been largely banished. Spring work is no longer the hectic business it used to be. Moreover, when his day's work is through in the field, so is he; he doesn't have to spend half the night caring for horses. His wife notices the difference in setting just so many less places around the meatable. — Lindsay Post.

Crude Oil In Canada

Unlimited Potential Source Of Crude Oil Is Coal

Sources of crude oil in Canada other than wells are the oil shales of the Maritime Provinces and the bituminous sand deposits in Alberta, but the great and almost unlimited potential source of crude oil is coal, and this Canada possesses in abundance. The study of coal for the discovery of processes for unlocking the oil and other riches that lie hidden in it, and the examination of the most economic methods of utilizing it, hold the attention of coal research workers today in Canada and elsewhere.

Such Extravagance

Mrs. Isaac: "Wake up, Isaac! A burglar is trying to get in!"

Isaac: "Well, wait till he opens the window and I shoot."

Mrs. Isaac: "Vy don't you shoot now?"

Isaac: "Vat! and break a pane of glass?"

BROADCASTS FROM CANADIAN ROCKIES

The Canadian National Railways have blazed a pioneer trail in Canadian radio broadcasting and it again made history with the transcontinental broadcast from Jasper Lodge, Jasper National Park, on the occasion of the opening of the Lodge for this season. This was the first broadcast to be made from Jasper; in fact, it was the first time a radio programme has found its origin in the Canadian Rockies.

Irvin Plumm and his Jasper Park Lodge Orchestra, which has just commenced its sixth summer engage-

ment at the Lodge, supplied the instrumental music for the historic broadcast. Madame Gladys Bell Owen, of Regina, who was the principal soprano in the New York production of "The Miracle," and Sydney J. Hendra, tenor, of Edmonton, were the soloists.

The illustration above shows: Irvin Plumm and his Jasper Park Lodge Orchestra; a Canadian National Railways observation car equipped with combination radio and phonograph; the announcer before the "Mike"; Jasper Park

Band of Intrepid Scientists To Penetrate Greenland In Order To Study Glacier Movements

Better Class Of Grain

Ninety-Eight Per Cent. Of The 1929 Wheat Crop Was Of Merchantable Quality

Of the total estimated wheat crop of 1929—viz., 299,520,000 bushels—98 per cent. is reported by crop correspondents as having proved to be of merchantable quality, this proportion representing 292,478,000 bushels. The previous year's corresponding figures were 95 per cent. or 537,085,000 bushels out of a total crop of 566,726,000 bushels. Of other main crops the merchantable proportions were as follows: Oats, 92 per cent. (90 per cent. the year before); barley, 93 per cent. (95 per cent. the year before); rye, 97 per cent. (96 per cent. the year before); buckwheat, 88 per cent. (86 per cent. the year before); corn for husking, 78 per cent. (76 per cent. the year before); flaxseed, 95 per cent. (93 per cent. the year before); potatoes, 83 per cent. (79 per cent. the year before); turnips, 82 per cent. (87 per cent. the year before); hay and clover, 92 per cent. (86 per cent. the year before). A complete summary appears in the April number of the "Federal" Monthly Bulletin of Agricultural Statistics.

Demurrage Would Be Heavy

Thousand Dollars A Day Against Zeppelin If Behind Schedule

Demurrage charges at the rate of \$1,000 a day would have been charged the Graf Zeppelin for every day she was behind schedule arriving at Lakehurst. The schedule of charges was arranged specially for this trip of the Graf Zeppelin. Besides the pre-arrival demurrage, there was a \$3,000 fee for preparing for the big ship's care at Lakehurst, and refueling cost \$2,000 a day besides the cost of the fuel. After refueling was completed, \$1,000 a day would have been charged for whatever time the Zeppelin's take-off was delayed by adverse weather. Thus the profits of the voyage could be largely diminished. Heretofore the Zeppelin has been entertained free of charge at Lakehurst. The steadily commercial trip with commercial charges, gave a good idea of the real cost of faster-than-air transportation, a cost vastly under-estimated by laymen in the past.

Demand For Homesteads

Number Of Entries In Western Canada Show Decided Increase

The first four months of the present year showed 503 more homesteads filed upon in Western Canada than during the same four months of last year. The increase was furnished almost entirely by Alberta, though British Columbia showed a small gain. The other two provinces were slightly under the 1929 figure. The total for the present year is 4,387. In their order of importance the entries are given as follows: Alberta, 2,611 as against 2,135 last year; Saskatchewan, 1,381 as against 1,385; British Columbia, 209 against 168; and Manitoba, 186 against 196.

Money Spent By Tourists

United States Visitors To Canada In 1929 Spent About \$289,000,000

In 1929 United States visitors to Canada spent about \$289,000,000 and Canadians spent in the United States about \$91,000,000.

Of the amount of United States money which flowed over the border about \$208,744,000 went by motor car. A table prepared by the Department of Commerce on the basis of questionnaires furnished automobile tourists estimates the gross expenditures of three groups of automobiles during 1929 as follows:

Sixty-day cars—\$163,652,000.

One-day cars—\$44,416,000.

Six months' cars—\$80,736,000.

Whitefish Fry For Western Lake

The recent dumping of 80,000 whitefish fry into Lesser Slave Lake should improve prospects for tourist fishermen, according to R. T. Rodd, supervisor of fisheries, just back from a tour over the grounds.

Using Spiders Webs

Spider's webs are being "cultivated" in Canada for use in aerial photography and surveying, being stretched across viewfinders to help operators secure more accurate direction.

It is just as true religion to take care of your health as to take care of your morals.

The lonely frozen wastes of Greenland are being penetrated by an intrepid band of German scientists who have just arrived, under the leadership of Prof. Alfred Wegener, meteorologist of the Austrian University of Graz. The object is to investigate meteorological and geophysical peculiarities of Greenland. Except the inaccessible Antarctic, Greenland is the only territory where a vast permanent ice cap exists. Its present condition is that of northern Europe during the ice age.

As Greenland is one of the world's "cold air centres," measurements of temperatures and variations of air pressure are of the greatest importance for framing Atlantic weather forecasts. They are indispensable if Greenland is to become as has been suggested, a future half-way point for aerial transportation between North America and Europe. Movements of glaciers and icebergs will constitute an important part of the investigations of Prof. Wegener and his men. Previous measurements have shown that Greenland glaciers move 100 times faster than Alpine glaciers; that is, with a speed of 30 to 60 feet a day.

To obtain exact figures, measuring instruments must remain in position for a whole year. The expedition plans to remain on the island for 18 months, and make observations at three bases, one on the coast; one at the edge of a glacier and one inland. The latest instruments, adaptations of the echosounders used in measuring ocean depths, have been taken to ascertain the thickness of the Greenland ice cap. The heaviest ice crust previously measured was 4,000 feet thick, and it is believed that further inland, the thickness will be 10,000 feet. Whether the weight of this prodigious mass of ice has pressed the land down to sea level, or even below it—the natural process in Scandinavia during the ice age—will be studied.

Unusual Restaurant In Berlin

Walters As Well As Patrons Are Deaf And Dumb

A restaurant has just been opened in Berlin where complete silence rules in spite of the most animated conversation. From the outside nothing distinguishes this remarkable place from hundreds of other "Kneipen." In most of these places there are also one or two bars for the hurried guest who requires no more than a drink and a "bit." Two similar bars faced me when I entered the deaf and dumb restaurant, but they are not used usually in a hurry, and although their quick gestures and facial expression often gave me the impression that they were excited, it is merely the need to express themselves by movements which creates the false impression of an excited crowd. Some of the patrons were having dinner, obviously in animated conversation; others had finished and were playing cards. All in deadly silence. Even the waiters were deaf and dumb, and the only sounds that could be heard were the clatter of plates and occasional tinkling of a coin.

Judge Kept The Evidence

An American lawyer of international reputation has been staying in London during the last few days. He told his friends how he went to some town in the South, where it was very hot, to plead a case. At lunch-time the judge asked him if he would like to join him. The lawyer accepted. The judge gave him some first-class whisky. "How did you get it?" he was asked. "Oh," said the judge with a chuckle, "we had a big bootlegging case here last week, and I kept the evidence."

McGinty—"I've a terrible corn on the bottom of me foot."

Pat—"That's a foine place to have it. Nobody can step on it but you."

"Your husband is very well liked as a doctor."

"Yes. His patients go to their death for him."—Karlstunen, Oslo.

The Magic of Electricity

We have absolutely nothing up our sleeves, but behind us is a mighty army of workers and a great system of lines and power plants. By the pressure of a button we will —

- TURN NIGHT INTO DAY
- COOK WITHOUT FIRE
- FREEZE WITHOUT ICE
- CHANGE THE WEEKLY WASH INTO SNOWY LINEN,
- CLEAN THE HOUSE WITHOUT DRUDGERY.

In other words, make life easier, happier and lighter in a thousand different ways.

CALGARY POWER COMPANY, LTD

Two or Three Binders Behind an Oliver Hart-Parr Tractor

That's the way to harvest in short time and at low cost. Hitch two or even three binders behind an Oliver Hart-Parr Tractor.

The Oliver Hart-Parr has the power to pull them — day after day, over smooth ground or rough. Hart-Parr power handles the exceptional job as well as the ordinary work of the farm.

Oliver Hart-Parr Power finishes the job before the grain gets over-ripe. It saves grain and it saves money.

Come in and see the Oliver Hart-Parr line.

VIKING

The Viking ball team covered themselves with glory and incidentally brought home the prize winning bacon at the Vegreville sports on Dominion day. Playing three straight games of baseball and winning them is a feat that is a record in that town and perhaps is a record that will take some beating at any tournament in this neck of the woods.

To make a long and happy story short, those from here who braved the elements, including the provincial untravelled highways, are congratulating themselves on the fact that they had ringside seats at one of the best baseball tournaments that have been staged for a long time.

Being publisher of this great family journal, we might be accused of being prejudiced in favor of everything that pertains to Viking, but we say it truthfully without fear or favor of being contradicted that there were some real ball teams present from other towns, and we give them their due credit for assisting Vegreville in putting over one of the best sports days that that town has held in many moons. That includes teams and supporters from Andrews, Camrose, Ryley, Holden, Vegreville, and other points west.

But coming back to the subject, Viking just naturally went out and had a fine batting practice against Holden-Camrose to the tune of 21 to 1 in four innings, Holden having four trips to bat, while Viking had three.

This gave the Vikings the urge to go out and take Vegreville into camp in the next game by the score of 6 to 2. And let it be said here and now that the score doesn't indicate just how close it was. Yes, me lads and lassies, it was anybody's game until the last ball was pitched by Young Fitzmaurice, the pitching ace of all the aces that were gathered for the fray. With a team behind him that fielded and batted almost a hundred per cent, there was no stopping the inevitable. Hitting on all six cylinders, the Kaator machine left nothing to be undone when raindrops and the shades of evening fell to dispel a happy and satisfied holiday crowd.

After disposing of the Vegreville aggregation, our lads had just enough time to tie themselves to the hot dog stands for a wee bite to eat before taking the field against the team from Andrews, a growing town on the new C.P.R. branch line. Trotting out a likely looking outfit, they looked formidable to say the least. Up to the seventh, the teams battled on even terms, with Viking on the long end of a 6 to 5 score. Darkness was falling, fast and raindrops were playing a tattoo on the umpire's dome, but nay, he would not call it a contest at the end of the seventh. What happened in the next inning will go down in the annals of the burg of Vegreville as the greatest landslide since the recent battle of ballots. Viking went off work and chalked up six more runs to end the tournament with three straight wins, 12 to 5.

To sum it up, it was Viking's day at Vegreville, and it was well earned. The rain that began to fall in bucketfuls just about the time to leave for home didn't dampen the enthusiasm that was felt for all the boys who played the game.

To Mitchell Fitzmaurice who started the first game, pitched the whole of the second, and was sent in at the tide of defeat in the last three innings of the final, many greetings and handclaps were extended. Young Jack McAtthey played a stellar game in the field and at bat, and it is some satisfaction to know that some local talent is being developed.

While sitting in the grandstand watching the ball game between Viking and Vegreville on Tuesday, Miss McHenry, stenographer at the local bank, was hit by a fast foul ball that came through the wire netting. She felt quite ill for a time but was able to be at work in the bank the following day as usual.

A new curtain has been installed in the Elks Community Hall. It is an artistic looking affair, and will fill a long felt need. It is liberally decorated with advertisements from local firms, with a landscape scene adorning the centre and the curtain as a whole is attractive to say the least.

Mr. and Mrs. H. M. Hilliker left by motor for Lake Valley, Sask., on Tuesday where they will spend the next ten days. At Lake Valley they will meet their son Cryler who is coming up from Detroit, Michigan, on a vacation.

Mr. and Mrs. H. McDougall, of Edmonton, are guests at the home of Mr. and Mrs. S. Lefsrud. Mr. McDougall was principal of the local schools in 1928, and is now principal of the Practice School at the Edmonton Normal School.

Mr. and Mrs. H. B. Collier and daughter, Mrs. Phyllis, and Mr. and Mrs. Bruce Collier returned on Saturday from a very pleasant two weeks spent at Banff summer resort.

BROADCASTS FROM CANADIAN ROCKIES

JASPER PARK LODGE ORCHESTRA

RADIO EQUIPPED OBSERVATION CAR

JASPER PARK LODGE

The Canadian National Railways have blazed a pioneer trail in Canadian radio broadcasting and it again made history with the transcontinental broadcast from Jasper Park Lodge, Jasper National Park, on the occasion of the opening of the Lodge for this season. This was the first broadcast to be made from Jasper, in fact, it was the first time a radio programme has found its origin in the Canadian Rockies. Irvin Plumm and his Jasper Park Lodge Orchestra, which has just commenced its sixth summer engagement at the Lodge, supplied the instrumental music for the historic broadcast. Madame Gladys Bell Owen, of Regina, who was the principal soprano in the New York production of "The Miracle," and Sydney J. Hendra, tenor, of Edmonton, were the soloists.

The illustration above shows: Irvin Plumm and his Jasper Park Lodge Orchestra; a Canadian National Railways observation car equipped with combination radio and phonograph; the announcer before the "Mike"; Jasper Park Lodge.

WORLD HAPPENINGS
BRIEFLY TOLD

On June 24, the King and Queen received the delegates to the Imperial Press Conference, in the throne room at Buckingham Palace.

British Columbia expects to benefit from the new Australian tariff just introduced in the Commonwealth House, extending a British preference to lumber.

Mr. Bennett Scott, the song composer whose "Take me back to dear old Bilitia" was sung by soldiers all over the world, died at his home at Lorraine Mansions, London, England.

Mr. and Mrs. Joe V. Ileneuvy, of Detroit, were burned to death when their airplane fell at the municipal airport, in Toledo, Ohio, and burst into flames.

President Hoover has approved transfer of the obsolete submarine P-12 from the navy to the U.S. shipping board which will charter the craft to Sir Hubert Wilkins for North Polar explorations.

P. E. Beattie, aged 50, an accountant in the Bank of Hong Kong and Shanghai, at Shanghai, disappeared from the "Empress of Russia," it was reported on the steamer's arrival at Vancouver. He was a passenger en route to Scotland with his wife.

Vincent Massey, retiring Canadian minister to the United States, who delivered the annual commencement address at the University of Michigan, Ann Arbor, was awarded an honorary degree of Doctor of Laws.

L. R. McGregor, new Australian trade commissioner to Canada, arrived at Victoria recently from Sydney with his wife and two children. He is particularly anxious to introduce Australian wines to Canada.

Switzerland Is Prosperous

Has Population Of Over 4,000,000 and People Are Good Workers

Switzerland, which has an area of only 19,950 square miles, has now a population of nearly 4,000,000 to which it has risen from 3,300,000 in 1900. Small as the country is, it has 30 towns of over 10,000 people. While the population has increased the mountainous regions are being deserted. The general growth of Switzerland is the more remarkable for the fact that one-fifth of the whole territory is mountainous and unproductive. Switzerland is almost destitute of native raw materials and yet she has 600,000 persons engaged in productive industry. In fact, it is not too much to say that if all the world worked as well as the people of Switzerland, it would be a happier place. Switzerland is never troubled by war or rumors of war.

Canada's Military Force

Consists Of 401 Officers and 1,067 Non-Commissioned Officers

Canada's permanent military force at the present time comprises 3,943 all ranks of whom 401 are officers and 1,067 non-commissioned officers. At headquarters in Ottawa there are nine naval officers, forty-nine military officers and thirty-one air officers. There are also at headquarters a total of 104 other ranks.

Four hundred and forty-three civilians are employed of whom 400 are permanent.

The cost of administering the headquarters totals \$1,425,311 annually.

Exhibit For Poultry Congress

A consignment of specially selected live poultry amounting to eighty-five birds, inspected and passed by Professor Wood, of Winnipeg, has been sent to Ottawa, where it will be linked up with the Canadian consignment of a thousand birds for the world's poultry congress. These birds include some of the choicest specimens of poultry to be found in the whole Dominion.

HOW THE RICH FARMER EQUIPPED HIMSELF AS A PROTECTION FORM MOTOR-ACCIDENTS IN THE CITY—Lustige Sachse, Leipzig.

W. N. U. 1844

Many Accidents Caused
By Neglected Cars

Carelessness Allows Defects To Develop In Mechanical Parts

Automobile owners in the United States who neglected to keep their cars in good condition were responsible for five thousand of the lives lost in traffic accidents during the last calendar year. This estimate is made by the framers of the report recently submitted to the National Conference on Street and Highway Safety at Washington, by its committee on the maintenance of motor vehicles. To learn that fully fifteen per cent. of the traffic fatalities recorded in 1929, are actually traceable to lack of proper care of cars is an enlightening disclosure. The studies of the committee into causes of motor accidents have convinced its members that stricter official inspection of all automobiles is urgently needed.

Essentially this report charges that because of improper maintenance defects are allowed to develop in vital mechanical parts of a car: brakes and steering gear are allowed to become dangerously worn or drop out of adjustment; horns, windshield wipers, rear lights and headlights uncared for become ineffective. A steady increase in driving speeds in the last few years has served only to increase the hazards created by the negligence of those who own cars and permit them to be operated when they are unfit to be driven on public highways. The committee recommends legislation that will enforce periodic inspection in States where such a precaution is not now taken. It suggests that in the case of old cars that have been reissued several times a certificate of inspection should be required when drivers' licenses are issued.

Pulsating Stars

Theory Advanced That Certain Stars Do Not Rotate

A theory that certain stars do not rotate, is presented to the American Association for the Advancement of Science, by Dr. Ross Gunn, of the Naval Research Laboratory. These non-rotating stars are "those which pulsate," that is, which expand and contract. The pulsating stars have the habit of enlarging their diameters millions of miles. They beat like vast fairy hearts.

One class of pulsating stars, the Cepheid variables, are the "light-houses" of the sky, that is, they enable astronomers to calculate the vast distances of space. Dr. Gunn's theory comes from study of magnetic fields about stars, especially those about the pulsating suns.

Working For Grain Show

C. Tice, secretary of the British Columbia publicity committee of the World's Grain Show, reports that a large district committee representing the community of Courtney on Vancouver Island, is working successfully in securing exhibitors. These exhibits will cover a number of classes and will do credit, no doubt, to this district when the time for competition arrives.

(By Anabelle Worthington).

Of course our new Summer Fashion Magazine contains all the vacation styles for grown-ups for afternoon, sports and home wear. But we haven't overlooked the kiddies. The two shown here are from the book which contains a large selection of attractive styles for children of all ages for party and general vacation wear. Price 20 cents.

TEN YEARS' GROWTH OF TOURIST TRADE

The rise in the value of Canada's tourist trade during the last ten years has been little short of phenomenal. Estimates of the expenditures made in the Dominion by tourists from other countries run back as far as 1920, and it will be found that during this ten-year period, 1920-29, inclusive, tourists from abroad are estimated to have spent in Canada a total of roughly \$1,682,000,000. Such a sum of money is almost staggering, and it is difficult to find comparisons enabling us to realize its immensity. Perhaps the most startling comparison that could be made is to place this sum alongside the enormous outlays that Canada was called upon to make in connection with the Great War. According to the Federal Public Accounts the total expenditure made by the Dominion Government under the heading "War and Demobilization" is placed at roughly \$1,685,000,000. Thus the expenditures made in Canada by tourists from other countries within the last ten years are estimated at an amount which falls only a few thousand dollars short of equalling Canada's immense outlays for war and demobilization purposes. It is not to be wondered at that the highest financial authorities in Canada have recently made a special point to direct public attention to the growth and possibilities of this comparatively youthful, recruit to the ranks of the Dominion's major economic interests.

Bacon Contest

Summer Bacon Litter Competition To Be Held In Saskatchewan

The Saskatchewan Livestock Branch, with the co-operation of the Dominion Live Stock Branch, is fostering a summer bacon litter competition as a stimulus and a first rate benefit to the wine industry of Saskatchewan. According to J. G. Robertson, Live Stock Commissioner for Saskatchewan, the province will be divided into five parts for the purpose of this contest, over which the prize money will be equally distributed. Among the conditions of entry it may be noted that litters must be farrowed between April 1st and July 1st, and may be out of a grade or a purebred sow, but must be sired by a registered bacon type boar, and at least nine pigs must be raised to marketing age.

New Duty For Policeman

Police officers at New Bern, North Carolina, have added a new duty to their daily routine. A hurry-up call sent three policemen to a home on the outskirts of the city. They found an irate father who informed them they were summoned to punish his stubborn son take a dose of medicine. The boy took it.

The arctic tent nests 11,000 miles from where it spends its winters.

The simplest element known to man is the hydrogen atom.

Trade With Russia

Canada's Exports To Soviet Russia Are On The Increase

"Soviet Russia may be said to be the only country, outside of Germany, in Central Europe which imports direct the bulk of its requirements of Canadian products," writes L. D. Wilgress, Canadian Trade Commissioner in Hamburg, in the "Commercial Intelligence Journal." "Other countries in this territory, such as Czechoslovakia, Austria and Poland, consume important quantities of Canadian goods, but these are usually consigned in the first instance to Hamburg and for this reason appear in the Canadian trade returns among the exports to Germany. Canada's exports to Soviet Russia in 1929 increased by \$1,137,068."

Of Course Not

A Grammar School student was set a question in an examination paper—"If twenty men reap a field in eight hours, how long will it take fifteen men to reap the same field?" The student thought long and carefully before writing the answer, and when he handed in the paper this is what the examiner read: "The field having been reaped by twenty men, could not be reaped by the fifteen."

A German scientist has devised a spectacle lens said to correct the defect of vision known as color-blindness.

The Courageous "Mounties"

Record Just As High Although Old Time Adventure Is Lacking

The commander of the detachment of the Royal Canadian Mounted Police that is now in London for the International Horse Show fell called upon the other day to explain away a little misconception about this famous force that still exists in some quarters. He endeavored to make it clear that the work of the Mounted Police nowadays is not, generally speaking, of the picturesque nature that it was a few decades ago. Gone is very considerable degree is the romance traditionally associated with this force. There are still the occasional "man hunt" through the wilds and other thrilling episodes that an admiring world still likes to conjure up about the "Mounties," but the life of most members of this force has, with the gradual extension of the frontiers of civilization in Canada, developed into a more or less humdrum affair. Little of what might be regarded as adventure is now experienced.

There need be no explaining away, however, of another traditional thing about the "Riders of the Plains." This is the famed courage of the force, which is as pronounced as ever, and still ready to meet the sternest test. The crowd at the London Horse Show had an unforgettable personal experience of this proud trait of the force. Constable Cuthbert, engaged with fellow "Mounties" in a Roman ride in the arena—a ride executed by men standing astride with their feet on different horses—slipped and fell, and although his leg was severely injured, he immediately remounted and carried the performance through to the end, this amid applause of thousands. The injured constable fainted when the act was over.

The Canadian Mounted Police of the present day have the courage and chivalry of those men of the force who preceded them under more rigorous circumstances. The cool courage of the "Mounties" is a real and living thing, something that is woven into the whole structure and record of this famous body of men. The incident reported from London was an illustration of that "get your man" code that has inspired its members to feats of unexcelled courage and sacrifice on the frontiers of their homeland over a period of almost half a century. — Regina (Evening) Leader-Post.

Recipes For This Week

(By Betty Barclay)

LEMON MARSHMALLOW COOKIES

- 3/4 cup shortening.
- 1 1/2 cups sugar.
- 2 eggs.
- 6 tablespoons lemon juice.
- Grated rind 1 lemon.
- 3 cups flour.
- 1 teaspoon baking powder.
- 1/2 teaspoon soda.
- 1/2 teaspoon salt.

Marshmallows.
Cream shortening; add sugar and cream again. Beat in eggs; add lemon juice and rind. Fold in sifted dry ingredients. Roll out on slightly floured board and cut out. Bake in a moderately hot oven (400 degrees) for 10 minutes; remove from oven, place half a marshmallow in the center of each and return to oven to brown.

CARROTS AND CHEESE

Mince twelve medium-sized carrots. Steam until tender. Put into a baking dish. Sprinkle liberally with cheese and a little salt and pepper. Beat three eggs and stir into a pint of milk that has been put on the stove to heat. Let the mixture thicken; then, pour over the carrots and cheese. Add more cheese for a top dressing. Put the baking dish in a pan of water and place in the oven to brown.

Sunspots and Rabbits

The number of pelts received by the Hudson's Bay Company from year to year since about 1840, show marked periodic variation. According to an investigation made at the Dominion Observatory, Ottawa, the number of rabbit pelts was, on the average, three times greater one year before the minimum of sunspots than at the maximum.

Need Musical Ear

The London bobbies have been taking music lessons. They are being trained to recognise the distinctive sounds of five horns which will be attached to King George's automobile.

Bremen, Germany, was visited by 228,000 tourists last year.

Medical inspection of schools is just being put into force in Ireland.

Desert Will
Become Garden

Young Engineer Raising River Jordan To Water Desert Land

A miracle is recorded in the Bible of the Jordan dividing at the word of the prophet. The miracle is being repeated now at the work of an engineer. Seoptics or atheists must believe what they can see.

Rutenberg, the engineer, is lifting the Jordan bodily and throwing it just where he wants it to fall, like the giant of fairy tales who lifts up mountains and hurls them at the heads of his enemies. And in a few years the oldest of countries will be electrified and the most dreary of deserts will become a green garden.

On the left are the forbidding and barren hills of Transjordan. Pedestrians are a rarity on the road to Jlar. After a few miles the sound is heard of a pick striking stone. There is a loud braying of donkeys and the puff puff of a small steam engine. And out of the desert the traveller falls into an oasis of concrete, the Rutenberg miracle.

Workers stop their work to gaze at the European stranger. "It is all very simple," says an enthusiastic young engineer, who is helping turn a hideous desert into gardens of loveliness. "All you have to do is know how to do it and then see that it is done. For miles around there is land rich in chemical fertilizer. The Dead Sea has been depositing it here for centuries. But there is no water and so the land is dead, deserted and desolate."

"But if we raise the Jordan thirty feet we shall be able to turn the desert into a paradise. It is quite simple. You see that concrete wall that goes sheer down, that is the first step. A little further along you will find another. It is believed that the service Rutenberg is doing Palestine by watering the 'desert places' is greater than by supplying it with electricity."

A Romantic Province

Colorful Pages Of Pioneer History In The West

The oldest of the Prairie provinces has had a romantic history. It gave birth to the romance of the West with its Red River carts, an association which colors the pages of pioneer history in the West. From what was Port Garry to what is today Winnipeg, is in itself a chronicle of a story replete with adventure and achievement. It is the story of early beginnings ending in great accomplishments, with the torch lit by the first pioneers now illuminating a great and prosperous province. July 15 will be a day of great pride to the people of Manitoba with what has been done serving as an incentive to further achievement, with the spirit and zeal of the early pioneers carried on to meet the needs of the modern day.—Lethbridge Herald.

Wood Produced From Cotton

New Material Has Been Perfected By Man In England

Synthetic wood produced from compressed and hardened cotton material has been perfected by a Clerkenwell, England, man. It is said to be indistinguishable from mahogany, oak, or any other wood, and can be used in making furniture and all kinds of house fixtures. Its cost is much less than ordinary wood and its life will be as long, the inventor says. It may be moulded into any warp. It is expected to reduce the cost of houses as well as of furniture.

Manufacture Of Rayon

In the manufacture of each pound of rayon by the viscose process, there are used one and a half pounds of wood pulp, two pounds of caustic soda, one and a fifth pounds of carbon bisulphide, and one and a half pounds of sulphuric acid.

The Central Railroad of Peru crosses the Andes at one point at 15,865 feet above sea level.

In Czechoslovakia there are fourteen women in Parliament, ten deputies and four senators.

"Were you driving for the first time?"

"No—the last."—Hummel, Hamburg.

WRIGLEY'S

When you need new energy, when you are hot and mouth is dry—pop up with Wrigley's—it moistens mouth and throat.

Keep awake with Wrigley's

CHAPTER XVIII.—Continued.

The doctor chuckled, glanced shrewdly at his companion, and replied: "I don't imagine that those rides were a real sacrifice to my assistant!"

"If they were," retorted Charnian with a dimple, "he disguised the fact with proper gallantry; but I'm none the less grateful to him. It's a long walk to District Four when the mercury hovers around zero, Doctor; and Grandma worries."

"I wish you didn't have to leave her, Charnian. The day must seem long now that winter has set in."

"I fear they seem a great deal longer than she admits," replied the girl. "Grandma's so patient and uncomplaining. But I can't give up the school, Doctor, even with the welcome board money coming in each week. I know we're foolish to cling to the old house the way we do. I might, in the name of common sense, be willing to part with it and break my heart, but I can't break Grandma's; and no other home would seem her own."

The old man was silent for a moment, and then said: "George K. tells me the house is really yours, Charnian."

"It is. I thought you knew that Grandma decided it to me a year ago. She got the idea that it might save trouble for me after she goes; and I let her do it because it made her happier."

"They rode half a mile in friendly silence. It was beginning to snow, the big flakes drifting down lazily and settling on the windshield."

"I've been thinking," said the doctor at last. "I can't help worrying about you, child, because I know, you see, that I shan't always be on hand to advise you when you may need advice. An idea came to me in the night, an idea that might suggest itself to you, and I'm telling you now so that if the time comes when you must part with the old homestead, you could consider it. It's this: If you sell the place, don't part with your great-grandfather's little office. You could live there comfortably, you and Grandma. With a kitchen and bathroom added at the back it would make a cozy enough home; and it would be home, in a way, to both of

"That you will tell I won't admit anything can ever take you from us, Doctor. How—we need you so. But I'll remember your suggestion. It's a good one, only—what would your young M.D. do for an office?"

"That point," answered the doctor, "will take care of itself."

Another moment of stillness followed; then he said, briskly, as if making a decision, "I think I'll confide in you, Charnian. You know, of course, that I haven't saved much money. I've had nothing to save for; and I've done my work for the world's sake, and the love I have for my loyal patients. I've kept my house in repair and paid my bills, and, providing there was enough for that, I haven't offended folks if they paid slowly, or even if they didn't pay at all. So you see, child, I'm no John D."

"I see," said the girl, wondering where this confidence was leading.

"I wonder how much John Carter has told you about his life," said the old man unexpectedly.

"Very little," replied Charnian, still puzzled.

"Possibly then, you don't know that as a boy he had almost everything he desired. His people were wealthy, and John and his sister might easily have been spoiled. They went to exclusive schools, and later mingled with what society calls 'the best,' meaning, I suppose, the 'most stylish.' John had always wanted to be a doctor, but he wasn't strong, and his father, knowing it to be a hard life, objected. The boy persisted, however, and after graduating from Harvard went into Medical School. In his second year there, his father died—a shock caused by financial worry. Though no one had guessed it, things had been going badly with his business. There was enough left to pay his creditors and save a few of the family heirlooms, nothing more. Two weeks later John's mother died in her sleep."

"Oh, that poor boy!" broke in Charnian with compassion.

"Poor boy, indeed," went on the doctor, "for he loved both parents dearly. The sister, fortunately, had married well. John continued his home with her, and went on studying—earning his own way—working too hard, and risking his not too robust health. That was his reason, my dear, for taking a country practice. He needs fresh air, and to get away from persistent invitations that would mean late hours. There are enough late hours in the life of the average doctor, without adding to them in society."

"He will certainly escape society in Wickfield!" smiled Charnian.

"Which is what he wants, and what brings me back to my starting point," John continued. "The boy is doing well. The Wickfield people like and respect him. He understands them, and takes hold as I'd hoped he would. So, though of course he doesn't guess it, when my time comes, Charnian, he will inherit what little I have to leave: a roof over his head, an office that folks are used to coming to; and the trust of my friends and patients. So you needn't worry about leaving him without an office if you and Grandma decide to make the change. He'll be provided for. All he needs is a good wife; and I'm wondering—"

The doctor paused, turning to look at Charnian so intently that her color rose.

"There are photographs of two perfect peaches on his bureau, and, according to Grandma, another in his watch!" she retorted lightly.

"And what is there in his heart, my dear?" asked the old man.

"How should I know?"

"Well," said the doctor, shaking his head, "if a red-blooded young fellow can live under the same roof with Charnian Davis, and not find something in his heart, I am mistaken. He should have been on his knees to her before this."

Charnian laughed as she responded: "I understand that they don't do it that way these days! And I've been told that a doctor's wife has a hard life."

"I think you could stand it," smiled her old friend. "I shouldn't want the lad to live alone, Charnian, as I have. He's like a son to me."

She ventured a little laugh.

"I believe that I regard him that way myself. It's a pleasure to keep his meals hot—he's so grateful."

"I'd rather you regarded him differently," said the doctor, sighing, "that is, unless—Dear me! Here we are at my destination. The widow Smithson has got the gripe, I shan't be long, child."

The girl glanced up, suddenly conscious of her surroundings. They had stopped before the small, brown, shabby cottage where Jim Bennett had once collected interest money—the place where Charnian had called him "Shylock."

CHAPTER XIX.

As the doctor went within, Charnian's thoughts drifted back to that ride with Jim—to all the changes that had come since, and to those that were destined to come before many years. The old man's confidence had stirred her deeply. He was younger than her grandmother, but he had lived a harder life and was breaking earlier. Probably he knew more about his condition than she had told her. The end might be nearer than it seemed; and he was "putting his house in order." It was like him to be ready when the call came; and to plan so that his care for her welfare went even beyond the grave.

Charnian shivered, not from cold, but from a sense of what life would be to her when all these natural changes had taken place. Even Grandma, happy as she was, could not go on for ever. What would there be for her in Wickfield without Grandma, the old doctor, and even Jim? There was John Carter, to be sure. Perhaps . . .

The girl's lovely color deepened just a trifle at the thought of where this reverie was leading. Then a child's fretful cry from within the cottage brought her back to the scene before her. The house seemed even shabbier than she remembered it—cold and uncomfortable in its wintry setting. A broken windowpane was stuffed with an old shawl. The shades at the windows were torn and sagging. What would such people do without a kindly counsellor like Doctor Howe? Would his successor be as lenient to unpaid bills—or would he collect relentlessly, as Jim Bennett had collected that interest for the bank?

No, Charnian's heart answered, John Carter would not be an inhuman creditor. There was a warm kindness about him that precluded such a thought. But, spoke up a loyal voice within her, Jim was kind also. Only in business . . . Did all business men care less about the human side of life? . . . Did days spent thinking in terms of money, blind one after a time to other needs?

She stirred as the door of the cottage opened and closed on her old friend, but he came to her side of the car and asked a question:

"Have you got Jim Bennett's address on the tip of your tongue, child? I can't remember it."

(To Be Continued.)

Fought At Waterloo

Widow To Obtain Pension Under New British Pension Act

That the widow of a man who fought at the Battle of Waterloo will be among those to obtain a pension under the new British Widows' and Orphans' Pension Act, was revealed by Arthur Greenwood, Minister of Health, in a speech at Hackney, England, recently. Her husband, he said, was 18 when he fought at Waterloo in 1815, and he did not marry until he was over 60, his wife being a young girl. This means, Greenwood continued, that her husband was born in 1797, in the days of George III., and among the events he would have been old enough to recall the death of Nelson and the war with America.

Neglect Of Good Books

Is One Of Great Crimes Of Modern Society

Stanley Unwin, of the well-known firm of London publishers, George Allen and Unwin, is convinced that "there are scores of thousands of our supposedly educated fellow countrymen who never enter a bookshop or spend even half a crown per annum on the purchase of a book." And the same is no doubt true of Canada. And it is quite probable that this same crowd that doesn't buy books doesn't get them out of the libraries and read them. The neglect of good books is one of the great crimes of modern society.

Miller's Worm Powders act mildly and without injury to the child, and there can be no doubt of their deadly effect upon worms. They have been in successful use for a long time and are recognized as a leading preparation for the purpose. They have proved their power in innumerable cases and have given relief to many children, who, but for the good offices of this compound, would have continued weak and enfeebled.

The yearly discharge of rivers into the Atlantic Ocean is estimated to be 3,400 cubic miles of water, or about one-half of the total river discharge of the world.

Biggest Borrower and Biggest Lender

Report Issued From Geneva Will Be Surprise To Many

It might be thought that Germany, with all her reparations needs, is the biggest borrower, and that the biggest lender in the world is the United States with all its gold.

Well, this isn't so on the per capita basis, at any rate, according to a report just issued by the League of Nations Economic Section at Geneva. This volume, according to a New York Times dispatch, jars several widely accepted ideas. The figures cover the year 1928, and the Times writer summarizes in part:

The country lending the most abroad per capita was not the United States, but The Netherlands, which was followed by France and the United Kingdom.

The country borrowing the most abroad per capita was not Germany, but Australia, which was followed by Germany, Argentina, Norway, and Hungary. Germany was greatest in the amount borrowed, her total being \$1,067,000,000, Australia was second, with a total of \$267,000,000.

The heaviest annual interest payments abroad per capita are not by Europeans, the most heavily indebted of European nations paying only from \$2 to \$5 per capita, but by Australia, New Zealand, Canada, Argentina, and South Africa, the citizens of these sparsely settled countries paying from \$10 to \$30 each.

The greatest net receipt from interest and dividends was still recorded by the United Kingdom, with \$1,387,000,000 and \$683,000,000, respectively, in 1928.

The United States, far from being a laggard in her merchant marine, had the second greatest gross income from maritime freights in 1928, the figures being for the United Kingdom \$357,000,000; for the United States \$239,000,000, and for Germany \$50,000,000, with Norway, Italy, and Sweden following.

Canada profits more from tourists than the country whose name is generally synonymous with touring, Switzerland. The nations receiving the most from foreign tourists are, in order, France, Italy, Canada, and Switzerland.—Literary Digest.

A Good Argument

Diner—"Waiter, is this chicken soup?"

Waiter—"Yes, sir."

"Well, I can't find any chicken in it."

"Well, really, sir, you wouldn't expect to find a horse in horse-radish, would you?"

Know Where To Go

Recently a woman from Dallas, Texas, arrived in New York to visit a friend. "I want to buy some cheap little trinkets to send back home for a joke," and the visitor, "Where is the Woolworth Building?"

The Chinese telephone exchange of San Francisco, Calif., has 2,300 subscribers; two of the operators have served for 20 years.

WHOLE FAMILY HAD DYSENTERY

Dysentery is one of the worst forms of bowel complaint and should be checked at once as its termination often proves fatal.

Mrs. H. F. Stewart, Flintridge, Sask., writes: "Two years ago we were all very bad with attacks of dysentery. My husband got a bottle of Dr. Fowler's Extract of Wild Strawberry and after taking three or four doses we were completely relieved. Since then we have never been without a bottle of it in the house."

On the market for the past 85 years; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

May Judge Perth Cattle

Kenneth McGregor, Manitoba Receives Invitation From Scotland

Kenneth McGregor, son of the Lieutenant-Governor of Manitoba, native of Amherstburg, and cousin of Malcolm McGregor, has been invited to act as a judge at the cattle show at Perth, Scotland, in February. This is the greatest Aberdeen-Angus annual event of its kind in Scotland and no Canadian has ever before been asked to act as judge. Mr. McGregor is a famous breeder of the Aberdeen-Angus cattle.

STURDY CHILDHOOD

The sturdy child—the bright, active little chap—is the one everybody loves. With many the sickly, fretful child who is not attractive. It is the birthright of every child to be sturdy and well—and it is up to you to see that he gets relief—that he is given a medicine that will quickly make him well and keep him well.

Baby's Own Tablets are especially designed for infants and young children. There is nothing to equal them for correcting the irregularities of the stomach and bowels, the cause of most of the ills from which little ones suffer. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Lead In Aeronautics

France Lays Claim To Holding Ninety Aviation Records

France is a country of birdmen. The International Aeronautical Federation controls officially 90 aviation records; and of these records, 28 of them are held by Frenchmen. Germans come next with 25 records, and Americans third, with 22. Italian hold eight records. English and Swiss birdmen hold three, each. Czechoslovakians have one record. The five important world records are divided as follows: Distance in a straight line and in a closed circle, France; speed, Germany; speed, England; duration, United States.—La Liberte.

Minard's for Falling Hair.

Again Break Records

Homestead filings at the Edmonton land office have again shattered all records. During April 529 homesteads and 19 soldier grants were taken up. The preceding April exceeded any previous month with 340 homesteads and 8 soldier grants.

CONSTIPATION COMPLETELY GONE

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE
MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

NORTHERN ALBERTA'S ANNUAL HOLIDAY

WILD ROSE FLORAL EMBLEM ALBERTA START- ING DOMINION DAY

On and after July 1st the wild rose is officially the floral emblem of Alberta, the act passed by the legislature at the last session going into effect on Dominion Day.

There is to be no ceremony about it, and the event will go into the po-

litical history of the province quite without fuss or formality. But the effect is that Alberta from now on will have a registered trademark that will give grace and beauty to its pictures and a pleasant relief to its equally typical wheat fields. The selection of the flower as Alberta's emblem has been favorably commented on by the press throughout

Canada.

And whether so intended or not, the act becomes effective at a time when the wild rose itself is at the height of its season. Miles upon miles of rural roadside are now edged to right and to left with rich displays of the emblematic flower—an exceptional case of nature blooming exuberantly in support of legislation.

Main Street

Mrs. F. Peterson is doing nicely but is still unable to leave her home. Even, to Mrs. Bob Dalton, June 25 a daughter. Both doing fine.

Miss Scott, teacher at Albert school has returned to her home at Kn-

sella for the vacation.

Miss Price, music teacher, left Wednesday night to spend her vacation at her home at Markerville, Alta.

Mr. W. A. Gamble, of the local bank bank staff, returned from his vacation Saturday.

Mr. N. D. McMillan, of Bremner, is spending his vacation in the Irma district.

Dorothy Geeson spent last week visiting at the home of J. R. Clark at Hardisty.

Mrs. McCallum, of Oakland, California is visiting her mother, Mrs. J. H. Elliott.

Mr. and Mrs. P. J. Hardy and Mrs. McGregor, motored to the City, Wednesday.

Mr. and Mrs. F. A. Reeds, of Midstone, Sask., spent the week end with Mr. and Mrs. I. S. Reeds at Irma.

Miss Irene Carbol, of Amisk, Alta., has been visiting at her brother's home, Mr. A. C. Carbol, of Irma.

Mrs. I. S. Reeds and her daughter Ruth, left Tuesday evening to visit friends and relatives at Lindsey, Ontario.

Mrs. Hewett, manager of the local telephone exchange, is spending her vacation with her sister in Saskatchewan.

Word reached Irma, Wednesday that Charles Archibald, won a decision over Kid Osborne, in a boxing bout at Peace River on Dominion day.

Quite a number of Irma residents spent the holiday at Wainwright where they report having seen some excellent ball games.

Mr. and Mrs. V. Bishop and Miss Bishop of Clyde, Alta., spent the week end with their son Mr. J. Bishop at Irma.

Dorothy Geeson invited a number of friends to her birthday party last Tuesday. Twelve girls had a good time with games, singing and eats.

Mr. and Mrs. G. A. Tripp left last Thursday for a motor trip to Calgary Banff and other southern Alberta points.

Mrs. J. G. Clark and her niece Miss Eleta Graham are visiting Mrs. Clark's daughter, Mrs. Harper, after spending the winter in Ontario.

There is a big demand for fresh killed, skinned rabbits, Jack or Cotton Tail, for feeding foxes. Just take them to the Chevrolet garage, Irma. Good prices paid.

Mrs. J. Knudson accompanied by her two daughters and son, of De Smet, South Dakota, are visiting with the Knudson's in the Coal Springs district.

Miss S. Stewart, teacher in the Junior room of the Irma public school left Wednesday night for a short stay in Edmonton after which she expects to spend the balance of her vacation in B. C.

Miss Orril Fischer who has been teaching near Viking for the last two years arrived home Saturday for her vacation. Miss Fischer intends going to the Summer School at Edmonton shortly.

Mr. Reeds left Monday evening to assist with the examining of papers for the Department of Education at Edmonton. After this task is completed Mr. Reeds expects to spend the rest of his vacation in Ontario.

Miss F. E. Welsh, matron of the Isolation Hospital at Edmonton, stopped off to visit her nephew, Mr. E. L. Elford, while on her way to attend the nurses convention at Regina, Sask.

Miss M. A. McClellan, nurse of Vancouver, stopped Monday on her way back from Regina where she had been attending the nurses' convention. Miss McClellan is a cousin of Mr. C. T. Hill with whom she is visiting.

Wednesday afternoon while ploughing, Mr. J. A. Bars, of the Albert district, was thrown from his plow when it hit a stone. Mr. Bars received a bad cut on the head which was dressed by Dr. Greenberg. From last reports Mr. Bars was resting easily and expected to be around again in a few days.

The members of the Loyal Orange Lodge will attend divine worship next Sunday evening at Irma. We welcome them most heartily and trust that the service will be an inspiration to us as well as to them. As accommodation is limited, we suggest that the members of the congregation assemble a little before the hour so as to secure seats.

Last Friday night the Irma district was visited with a severe electric storm which disabled the Calgary Power service at Irma. One of the transformers was put out of commission and it was necessary to install a new one which was connected up in time to supply power by Saturday noon. The electricity was also off during the severe storm Monday night.
